PROFILE

Highly motivated and enthusiastic graduate with many years of experience within work-based environments, with an advanced knowledge of computing gathered via an applied computing degree from Bath University. Throughout my degree I studied various software development methods but specialised in website design and development. I am very keen to develop these skills through self-learning and a professional environment.

COMPETENCIES

- Delivering at pace and working in pressured situations with limited timeframes throughout my three-year degree.
- A thirst for developing and building on existing skills and competencies independently and through University and paid jobs. Actively embracing change and continuous improvement.
- Lots of experience and working with and providing real world software solutions for clients ensuring a Customer focus always.
- Studied a very wide variety of modules within different aspects of computing, giving me a broad knowledge of the Industry.
- Enjoy teamworking and supporting others to meet Customers' demands.
- Highly focussed and always trying to deliver a quality product on time. Delivering on my promises.
